

aquarion

HIGH PERFORMANCE ENGINEERING

AQUARION is a leading provider of Advanced Water Systems, Solutions and Technologies for the Oil & Gas Industry, the Energy Sector and other Heavy Industries.

ABOUT AQUARION

As a total enhanced EPC Solution Provider, The **produced water, seawater for injection, process and potable water, cooling water, boiler feed water, spent caustic treatment and refinery waste water**. The Group offers solutions to some of the most critical water and waste water requirements such as produced water, seawater for injection, process and potable water, cooling water, boiler feed water, spent caustic treatment and refinery waste water.

AQUARION provides the best available technologies, high quality engineering, international expertise and local know how from its operations in **Germany, Switzerland, Italy, UK**. Optimization of complete water cycles and the use of recycling technologies are key in achieving environmental and commercial targets in all industrial applications. Using high-tech water treatment technologies in a holistic manner, our standard compliant systems are designed to meet the requirements and demands of tomorrow.

MARKETS

OIL & GAS (Upstream / Downstream):

AQUARION provides a range of process equipment and services to both the Upstream and Downstream Oil and Gas.

DESALINATION:

Desalination technologies can be provided using either membrane or thermal processes or a hybridization of both to provide cost effective process and drinking water in areas of low water availability.

ENERGY – POWER:

Participation in the Power & Energy sector includes Condensate Polishing, Demineralized Water, Cooling Water Make-up Water and Cooling Tower Blow-Down.

MINING:

As mining activities often take place in arid environments recycling technologies and ZLD concepts provide economic solutions.

Chemikals / Steel:

Industrial markets utilize water recycling and production, process water reuse, demineralized water, boiler feed water and waste water treatment.
